

Collected Papers (Classic Reprint)

By Fredrick Chapman

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Collected Papers They are found at various horizons in clays and limestones, from the lower to near the upper portion of the series. Most of the localities at which the Ostracoda were abundant (Nos. 585, 589, 26, 297), seem to be near the middle portion of the series. Here they are enormously abundant, often forming layers of impure limestone a foot or more in thickness. The limestone strata, of which there are usually several, alternate with beds of either clayey or tufaceous material ten or more feet thick. The conditions favoring growth and multiplication of the Ostracoda seem to have been particularly favorable in this region during the period in which these limestone beds were laid down. Lower down in the series, at locality No. 587, Ostracoda are quite abundant in a soft blue shale. Near the top of the section they are frequently present, but not in such numbers as to form a marked feature of the rocks. Localities. The five rock samples received are localized as follows: No. 585. Wild Cat Canon, opposite...
