

## Regulation Of Grid Voltage using an integrated Wind-PV system as STATCOM in Distributed Generation systems.

Filesize: 4.76 MB

### ***Reviews***

*A whole new eBook with an all new standpoint. It is actually rally fascinating throgh reading through time period. You wont truly feel monotony at anytime of your own time (that's what catalogues are for relating to when you request me).*

*(Claire Bartell)*

## REGULATION OF GRID VOLTAGE USING AN INTEGRATED WIND-PV SYSTEM AS STATCOM IN DISTRIBUTED GENERATION SYSTEMS.

GRIN Verlag Gmbh Dez 2014, 2014. Taschenbuch. Book Condition: Neu. 210x148x1 mm. This item is printed on demand - Print on Demand Neuware - Research Paper from the year 2014 in the subject Energy Sciences, grade: B.E EEE First Class, , course: M.E Power & Energy Systems Engineering, language: English, comment: Kindly also Publish the name of Co-author of the paper.This Paper was written to enlighten the Energy Engineers about the recent trends and development of Renewable Energy and improvement of power quality using the same with an energy efficient solution as proposed in the paper. This paper also highlights the flexibility of a FACTS based Compensator compared to conventional compensating methods. , abstract: In the proposed paper, it is described how a Solar PV Farm along with a battery storage system can be used to regulate grid voltage in a PV-Wind integrated distributed generation System. At night time Solar PV system is normally dormant (i.e. it does not generate power) but the stored power in batteries can be utilised efficiently to regulate the common coupling voltage by means of a FACTS based Static Synchronous Compensator (STATCOM) thereby improving the power quality. Various Utilities are facing major issues with Grid Integration of various types of Renewable Energy Distributed Systems while ensuring power quality ,Regulation and Stability. During day time the inverter of PV system provides the power to Grid but during night time PV farm is inactive and stored energy in the batteries can be used as power source to PV inverter for implementing a STATCOM. with advancements in RES and increasing DG systems to provide for load demand the quality of power has to be maintained to optimum value and this paper focuses purely on improving regulation of voltage without using external regulation devices but the installed RES system....
