

Dual Arithmetic Volume 1; A New Art

Filesize: 6.74 MB

Reviews

Totally one of the better pdf I actually have at any time go through. It is loaded with knowledge and wisdom You can expect to like just how the author write this book.

(Mr. Grover Kuphal PhD)

DUAL ARITHMETIC VOLUME 1; A NEW ART

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1863 Excerpt: .as it will not, when reduced, give a unit in the seventh decimal place. $1 - (13660714) = -9906244 = \sin 97^{\circ} 51' 5'' - 6'' - 1346492 : 8 :: -9906244 : 58-864$ the required distance. In solving this example, lengthened details are entered into, to prevent obscurity; the results are carried to a degree of accuracy seldom required in practice, to show the delicacy and powers of the method. It may also be observed, that, to find the distance it was not necessary to find the degrees, minutes, c. contained in the arcs. The work of this example, without superfluities, carried out to five places of decimals, may be arranged as follows: 13463 sine of arc 13504. 3463: 8:: 99062: 58-864 as before. The length of an arc (-13704) to radius 1, and its sine (43661) being known, and the cosine required: it is a question whether it is easier to find the cosine from the sine by the well known expression, $\sin^2 + \cos^2 = 1$, or to find the cosine, by Dual Arithmetic, in a direct manner from the length of the arc. To square five or six figures, and afterwards to extract the square root of twice as many, appear to involve more mental labour than the following direct method: $13704 = 130,5,3, (-13)^2 = -01690$ to five decimal places $(43)^4 = -00029$. 12. Find the meridional parts answering to any given latitude (35) by a direct calculation. The meridional parts y for any latitude x, is given by the formula $y = 343774679 \log \dots$
