Claude Black Glass Mirrors.--Claude s black glass mirrors, for perspective drawing. These are very useful for the young artist, as they condense or diminish the view into the size desired for the intended picture, and all objects bear their relative proportions. Price, \$2.50. VOL. H.--17 Apparatus for the Polarization of light.--The phenomena produced by the polarization of light are among the most splendid and singular in the whole range of physical science. Common light consists of undulations, in which the vibrations of each particle are in the plane perpendicular to the wave s motion. The polarization of light is the resolution of each vibration into two; one parallel to a given plane passing through the direction of the wave s motion, and the..
