

## Experimental Results of Thin-Film Photovoltaic Cells in a Low Density Leo Plasma Environment: Ground Tests

By Joel T. Galofaro

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Plasma ground testing results, conducted at the Glenn Research Center (GRC) National Plasma Interaction (N-PI) Facility, are presented for a number of thin-film photovoltaic cells. The cells represent a mix of promising new technologies identified by the Air Force Research Laboratory (AFRL) under the CYGNUS Space Science Technology Experiment (SSTE-4) Program. The current ground tests are aimed at characterizing the performance and survivability of thin film technologies in the harsh low earth orbital space environment where they will be flown. Measurements of parasitic current loss, charging dielectric breakdown of cover-slide coatings and arcing threshold tests are performed for each individual cell. These measurements are followed by a series of experiments designed to test for catastrophic arc failure mechanisms. A special type of power supply, called a solar array simulator (SAS) with adjustable voltage and current limits on the supply's output, is employed to bias two adjacent cells at a predetermined voltage and current. The bias voltage is incrementally ramped up until a sustained arc results. Sustained arcs are precursors to catastrophic arc failure where the arc current rises to a maximum...

### Reviews

*This sort of book is almost everything and made me seeking ahead of time plus more. It is actually rally intriguing through reading time period. You can expect to like how the author publish this publication.*

-- **Mrs. Ozella Nitzsche**

*Very helpful to all of class of men and women. It is rally exciting throgh reading through time period. Your daily life period is going to be transform the instant you comprehensive looking at this ebook.*
